- Change Automated parameters in Real Time on the fly... .

ENTRY Modules

- BWT Precision Trend Algorithm
Our Original Universal Volatility Based Algorithm Trades any Market, Bartype or Timeframe
- BWT Line Break Algorithm
A Custom Algo Designed to effectively Trade Line Break Charts
- BWT Breakout Box
Draw a Zone on anychart to enter a position only if price enters and exits the “zone” can be long or short only or both.

ENTRY MANAGEMENT

- True Entry by Stop, Limit or Market order, Add Ticks for pullback entry with Limit Orders
- Enter at High, Low or Close of a bar with Limit or Stop Order
- Offset entry by Ticks – i.e. Buy Stop Bar High + 1 ticks, Buy Limit Close – 1 or more Ticks
- Require Entry to be above or below High or Low of x bars ago i.e. Range or Consolidation Breakout

TRADE FILTER – ENTRY

- Filter by BWT Precision Trend
- Filter entry by Higher Time Frame (aka HTF, Anchor Chart) Small and Large Time Frame must be in agreement to enter a trade.
- Open Range Breakout Filter (ORB) – Trades Long Only if Above Session Open, Trade short Only if below. Option to set a No Trade Zone (NTZ) x ticks above or below open. This filter is simple but is extremely reliable works very well in several situations and avoids small whipsaw pullbacks when the market moves big in one direction.
- Filter by highest high or lowest low of x bars ago, and add (offset) ticks to the entry price, i.e. Buy at the Highest High of 5 bars ago plus 3 ticks.
- Proprietary BWT MA Filter Set – filter by any of five different moving averages,

TRADE FILTER – EXIT

- Unique BWT Parabolic Exit
- Also see Money Management Trail Stops
- Exit Time can be varied

TRADE MANAGEMENT: Keep Profits and minimize losses

- BWT Trade Manager – Allows 1 button click to move stops, drag stops, enter at a specific price
- Trail Stops by Bars, Ticks, Profit Percent, or Volatility Stop
- Unique Trail Stop Reset – Reset up to 3 levels of Trail Stops to reduce risk and lock in profit
- In Real Time, Change ANY Parameter, a truly unique feature, does not refresh your chart
Tighten/modify Trail Stop as trade progresses, Change Daily Goal and More
- Mix and Match Trail Stops – Start with trail Stop by ticks
change to trail by bars, ATR or Percentage of Profit at desired profit level

DAILY PROFIT GOALS

- Set Daily Profit Goals and Loss Limits expressed in dollars – System Stops Trading when goal is reached
- Set Maximum # of Winners or Losers for system to stop trading

TRADING TIME

- The time that a strategy begins, ends, and is allowed to trade are critical factors in a trading system.
 - Set Begin and End Time system is allowed to trade
 - Set Exit time for all trades
 - Optimize the Begin and End Times of the strategy to the minute.
 - Separate Friday Exit Time to reduce risk for swing trades not to be held over the weekend

SETTINGS TEMPLATES MANAGER

- Save Groups of saved Parameters (Template) Recall via Drop Down List saves time and allows for efficient testing and changing of parameters
- Store Multiple Templates by name
- Load Templates by name
